Tips for taking pictures that sell:

- **Use a plain background.** A white or neutral backdrop is best.
- **Clear photos.** To avoid fuzzy photos, use a tripod or rest your phone/ camera on a flat surface and set a shutter timer to eliminate excess motion.
- **High-resolution photos.** Use medium or high resolution files so that buyers can enlarge and zoom in on the photo.
- **Capture the details.** Make focal point the center of your photo. Also, include photos that show flaws or blemishes and share the details in the description.
- **Avoid using props.** Using props may confuse the buyer of what is exactly included in your listing.
